Ayesha Fatima

Full Stack Developer · AI Engineer · AI Automation

Email: ayeshafatimaitcs360@gmail.com · GitHub: github.com/AF-Codes123 · Portfolio: [add your live portfolio link after deploy]

Summary

Full Stack Developer and AI Engineer with a data science background in machine learning, deep learning and generative AI. I build clean web apps and AI-powered products, and I have deployed several of them live. [Optional: add one line about the kind of role or work you want.]

Skills

- **Full Stack:** React, Node.js, Express, REST APIs, Databases
- **AI and Data Science:** Python, Machine Learning, Deep Learning, Generative AI, AI Agents
- **Automation:** AI Automation, Workflows, n8n [keep only the tools you really use]
- **Tools:** Git, GitHub

Experience

Research Analyst Intern

[Shah Tech] · [13 May 2026 – 13 August 2026]

Projects

Job Scam Detector (Machine Learning)

Live site · GitHub

- Machine learning model that flags fake job postings so people can avoid scams.
- Users can paste the job description or upload a screenshot, and OCR reads the text from the image.
- Deployed as a live web app. Tech: Python, scikit-learn, NLP, OCR.
- [Add a real result, for example the accuracy on your test set.]

AI Smart Study Chatbot (AI + Web)

Live site · GitHub

- Smart chatbot that helps students study, delivered as a deployed web app with a login system.
- Tech: Python, LLM, web development.

Nawab's Table (Full Stack)

Live site · GitHub

- Full stack website for a restaurant with a menu page and a live open or closed status on the homepage.
- Tech: React, Node.js, Database.

Showroom Website (Full Stack)

Live site · GitHub

- Premium, image-led website for a luxury car showroom, built to be responsive on every device.
- Tech: React, Node.js.

More machine learning and deep learning projects are on my GitHub: github.com/AF-Codes123

Education

Data Science · Virtual University · 2024 – Present

Certifications

Freelancing course · [Digiskills,2026]
